B&C CORPORATE SUSTAINABILITY

OUR APPROACH

The Cotton Group's sustainability work is integrated into our culture and values. We believe a long-term approach is a must when it comes to dealing with complex SUSTAINABILITY issues, and we work to ensure that sustainability is integrated into all aspects of everything we do.

Our entire business must be conducted in a way that is ECONOMICALLY, SOCIALLY and ENVIRONMENTALLY sustainable.

That's the reason we have set clear ambitions and goals which we are implementing on a daily basis. Not bound by convention. Our success lies in developing new ways of doing things.

OUR MODEL

We want to create positive changes along our value chain – from the FARMS and FACTORIES that supply us, through to warehousing and transport, and ultimately to our CUSTOMERS.

We want to create value with products which are beautiful, ethical and high-quality throughout their lifecycle.

We want to adopt a thorough and responsible approach at every stage of the process from design and sourcing, to manufacturing, quality control, logistics and sales.

Member of amfori, the leading global business association for open and sustainable trade. For more information visit www.amfori.org

OUR COMMITMENT TO PEOPLE

One particular focus area is the protection and improvement of human rights along our value chain. The Cotton Group strives to make sure that the most stringent labour standards are upheld and safeguarded in the factories.

WE ARE PROUD TO BE A MEMBER OF

the FAIR WEAR FOUNDATION and the BSCI, and to be a participant in the UNITED NATIONS GLOBAL COMPACT. All these initiatives bring security and improvement in the field of human rights.

HAVING OUR OWN TEAM IN THE PRODUCTION COUNTRY

which works closely with our suppliers is key. We can ensure that our code of conduct is implemented and that we constantly improve our suppliers' best practices.

B&C IS A MEMBER OF THE FAIR WEAR FOUNDATION

The Fair Wear Foundation (FWF) is an independent, non-profit organisation that works with companies and factories to improve labour conditions for garment workers. B&C signed up to the FWF's Code of Labour Practices in 2009, and thereby committed to adhere to these labour standards in their own business operations. The Fair Wear Foundation (FWF) exists to promote fair labour conditions in the garment industry worldwide and to supervise audits internationally. The Fair Wear Foundation verifies that the Code of Labour Practices is implemented and respected at the factories. By becoming a member of FWF, we have committed ourselves to implementing and maintaining a Code of Conduct designed specifically for the garment industry. This Code of Conduct is based on the Conventions of the International Labour Organization and the Universal Declaration of Human Rights.

This includes the following standards:

- No use of child labour,
- No use of forced labour,
- Safe and healthy working conditions,
- Legal labour contract,
- Payment of a living wage,
- Freedom of association and the right to collective bargaining,
- No discrimination against workers,
- No excessive working hours.

Member of amfori, the leading global business association for open and sustainable trade. For more information visit www.amfori.org

MEMBER OF BSCI

Since 1 October 2016

Since 2003, amfori BSCI has enabled companies to trade with purpose by improving social performance in their supply chain. All members of the amfori BSCI support a strong code of conduct that has 11 principles. These range from fair remuneration to no child labour or ethical business behaviour along with a step-by-step approach that enables companies to monitor, engage, get empowered and receive support to put sustainable trade at the heart of their member's business. More on amfori.org

SECURING GOOD WORKING CONDITIONS

We have our own offices and teams in the production countries themselves. We ensure that **ALL NEW PARTNERSHIPS ARE UNDER CERTIFICATION**. The Cotton Group also cares greatly about finding partners who share our respect for people as well as the environment, and who are willing to work with us to improve their practices. **THE COTTON GROUP LIAISON OFFICE EMPLOYEES** work directly with our business partners to build good relations, assess their performance against our Sustainability Commitment, and support them in making improvements through different programmes and activities. Not only do they have close relationships with our business partners, but also with non-governmental organisations, experts, stakeholders and local governments, meaning they have an insight on the challenges involved and understand how to drive improvements in a local context. Once we establish a partnership, we work together with the supplier to improve their sustainability performance through training, but also by rewarding the suppliers who perform well by ordering larger quantities of products.

OUR COMMITMENT TO THE ENVIRONMENT & PEOPLE

HI! I'M ORGANIC

We are changing the rules of organic products for you and are increasing our positive impact on the planet at the same time. Previously, you had the choice between very expensive organic styles or a single T-shirt hidden away in different collections. Today with B&C, you can choose from 22 certified organic styles over 3 ranges - T-shirts, polo shirts and sweatshirts. This includes a short-sleeved entry-price tubular organic T-shirt, allowing any business to combine sustainability with volume.

With 14 T-shirts, 2 polo shirts and 6 sweatshirts all made of 100% organic cotton (80% organic cotton and 20% recycled polyester for sweatshirts), at a very competitive market price, you have a complete offer to meet any market demand.

Each time you buy an organic cotton T-shirt instead of a conventional cotton one, you are reducing water consumption by 91% (around 397 litres of water). Organic Cotton is also grown within a rotation system that builds soil fertility, protects biodiversity, and is grown without the use of synthetic fertilizers, toxic pesticides or GMOs.

Conventional Cotton Organic Cotton

Same cotton T-shirt
One uses cotton that consumes **91% less water.**

We are expanding our

ORGANIC certified cotton offer and we introduce

Recycled RCS Certified Polyester

Each sweatshirt recycles **5 plastic bottles** of 1.5L

TOGETHER WE CAN INSPIRE THE MARKET.

* CERTIFIED BY CONTROL UNION CU 1030092

CHALLENGES OF CONVENTIONAL COTTON

Cotton is a water intensive crop (e.g. around 22,500 litres per kg of cotton in India) and is commonly grown in dry regions. When not grown according to sustainable practices, cotton production can also be an intensive user of pesticides and petroleum-based fertilisers.

Over 60% of the world's cotton is produced by small holder cotton farmers, who are among the poorest in the world and often suffer high levels of debt, in part due to high input costs (such as pesticides and fertilisers). Like other crops, cotton farming can lead to land clearing, soil erosion and contamination, and loss of soil biodiversity.

Knowing that 95% of our products are made of cotton, we had to act. How has B&C decided to deal with the challenges of conventional cotton?

We are a proud member of The Better Cotton Initiative / BCI.

The Better Cotton Initiative (BCI) is the largest cotton sustainability programme in the world. Together with their partners, BCI provides training on more sustainable farming practices to more than two million cotton farmers in 21 countries. In the 2017-18 cotton season, licensed BCI Farmers produced more than five million metric tonnes of "Better Cotton" – that accounts for around 19% of global cotton production!* BCI is striving to transform cotton production from the ground up by helping cotton farmers adopt sustainable agricultural practices and produce "Better Cotton" – better for farmers, the environment and the textile sector's future.

*"Better Cotton" is sourced via a system of Mass Balance.

Transforming global cotton production starts with farmers. Supporting farmers sits at the core of BCI. By 2020, BCI aims to support 5 million cotton farmers in adopting more sustainable agricultural practices and improving their livelihoods.

To do this, BCI focuses on the diverse social, environmental and economic challenges faced by cotton farmers around the world, from drought in Australia to flooding in China and gender equality in Pakistan. BCI comprehensive programme of training, practical demonstrations and knowledge-sharing helps farmers to raise their yields, reduce their impacts on the environment and improve working conditions. BCI addresses multiple environmental issues – from soil health and pesticide use to water stewardship – and raises awareness of the importance of Decent Work (defined by the International Labour Organization) as work that provides opportunities for people to work productively in conditions of freedom, equity, security and human dignity, focusing in particular on promoting women's empowerment and preventing child labour. The collective impact of all our efforts helps to strengthen local economies and promote sustainable development.

Being a member of BCI helps to demonstrate that an organisation is committed to sourcing sustainable raw materials and supporting sustainable cotton. At B&C, cotton accounts for 95% of all the raw materials we use for products, so it is a critical commodity for us. BCI is crucial to help us reduce our impact on the environment and to prove that to our customers and key stakeholders.

OUR COMMITMENT TO THE ENVIRONMENT

All B&C projects are filtered through the “lowest environment impact possible” filter.

TEXTILE EXCHANGE ACTIVE MEMBERSHIP

Textile Exchange is a global non-profit organisation that works closely with their members to drive industry transformation in preferred fibres, integrity and standards, and responsible supply networks. Textile Exchange identifies and shares best practices regarding farming, materials, processing, traceability and product end-of-life in order to reduce the textile industry's impact on the world's water, soil and air, and the human population.

The mission of Textile Exchange is to inspire and equip people to accelerate sustainable practices in the textile value chain*. Textile Exchange focuses on minimizing the harmful impacts of the global textile industry and maximizing its positive effects.

The Cotton Group is an active member of Textile Exchange.

*See 2019 achievements of The Cotton Group in this respect

B&C GREEN WAREHOUSE IN BERINGEN

WINDMILLS	LOCAL GREEN ENERGY ACCOUNTS	SOLAR PANELS	LED LIGHTS	NATURAL GAS HEATING
ENERGY PRODUCED 9.250 mWh which equals the energy consumption of 2.250 families	REDUCTION CO ₂ -EMISSIONS 85,5 TONS per year	ENERGY PRODUCED 1.000 mWh which equals the energy consumption of 250 families	Use of LED lights inside and outside the buildings REDUCTION CO ₂ -EMISSIONS 10,5 TONS per year	REDUCTION CO ₂ -EMISSIONS 7,3 TONS per year

TOTAL CO₂-EMISSIONS REDUCTION
103,3 TONS PER YEAR

TRANSPORT CHALLENGE

Transport represents around 6% of the greenhouse gas emissions in a garment's lifecycle. By choosing the right modes of transport, we can reduce this impact even further.

1. We use sea freight rather than air freight from factories to the port in Antwerp. We use barges rather than trucks to transport our products from the port to our warehouses.

2. To decrease the impact of transport to wholesalers' warehouses, we have based our warehouse in a very central location and in a non-congested traffic zone to reduce CO₂ emissions created by lorry transport.

3. We also ask and encourage the transport companies we use to make more environmentally friendly decisions.

LET YOUR BUSINESS EMBRACE STEADY SUSTAINABILITY.

OUR COMMITMENT TO QUALITY

PREMIUM FABRICS LAND TO PERSONALISATION EXCELLENCE

We're inspired by your business and this drives us to bring you the best - whatever style you choose; you can trust in B&C quality.

Our passion for quality knows no bounds, it is only matched by our drive to deliver the most inspiring contemporary collection for the promotional market.

We take great care in the choice of all of our fabrics. Not only must they complement the styling of each garment and ensure the wearer the highest level of comfort, they must also deliver the best results in decoration.

From T-shirts to jackets, from softshell to sweatshirts, we test all our fabrics with various decoration techniques so you can be confident that whenever you choose a B&C style you will have the perfect support for your brand or message.

B&C CERTIFICATIONS

At B&C Collection, we believe that you shouldn't have to choose between something that looks good and something that does good too. That's why we are proud of our industry certifications.

OCS CERTIFICATION

The B&C ORGANIC T-shirts, polo shirts and sweatshirts are made with OCS certified organic cotton. Products certified to the "Organic Content Standard/OCS" contain organically grown content that has been (independently) verified at each stage of the supply chain, from the farm to the finished products.

Organic cotton is produced and certified to organic agricultural standards, which require practices to sustain ecosystems.

Our products made of organic cotton are certified by Control Union under certification number CU 1030092.

RCS CERTIFICATION

The "Recycled Claim Standard/RCS" verifies recycled content and tracks it from the source to the final product. The RCS verifies the presence and amount of recycled material in a final product.

This happens through input and chain-of-custody verification from a third party. It allows for the transparent, consistent and comprehensive independent evaluation and verification of recycled material content claims on products.

Our products made of recycled polyester are certified by Control Union under certification number CU 1030092.

PETA CERTIFIES B&C AS 100% VEGAN

We're proud to announce that we are officially certified by PETA as an approved vegan brand. It means there are no animal products involved in any part of the creation of our products. PETA (People for the Ethical Treatment of Animals) is the largest animal rights organisation in the world, with more than 6.5 million members and supporters. The companies that have signed PETA's statement of assurance have verified that neither they nor their ingredient suppliers conduct, commission, or pay for any tests on animals for their ingredients, formulations, or finished products anywhere in the world and won't do so in the future.

LAB TESTS

B&C SHIRTS ARE MADE TO LAST

B&C styles are intensively tested before, during and after production.

We need to make sure the garments you choose for your teams and staff have the right performance and high quality that meets your business requirements.

This is why we regularly carry out independent test labs with accredited laboratories on our stock of shirts.

WHAT ARE WE TESTING ?

✓ **FABRIC PERFORMANCE**

✓ **COLOUR FASTNESS**

after wash and against light

✓ **DIMENSIONAL STABILITY**

low shrinkage

✓ **COLOUR BLEEDING**

✓ **FABRIC RESISTANCE TO TENSION**

✓ **PILLING**

✓ **SEAMS RESISTANCE TO TENSION**

CONCLUSION

- B&C SHIRT FABRICS SUCCEED IN ALL POINTS WITH A HIGH SCORE -
(REGULARLY ABOVE AVERAGE)

Through this process, B&C guarantees that the styles you buy are made of high quality fabrics that are durable and easy to care for.

It also allows B&C Collection to guarantee that you can be confident each repeat order will be identical, whatever the timeframe.

THE SHIRT BUYER'S GUIDE

5 STEPS TO GET THE RIGHT SHIRT FOR YOUR BUSINESS

Choosing the right shirt is not always an easy task. You have many aspects to consider. Follow these 5 easy steps of the B&C shirts buyer's guide and get the right shirt uniform for your employees, whatever your business.

1 CHOOSE THE TYPE OF FABRIC YOU NEED

Depending on how much physical activity your employees will be doing or the temperature they are working in, consider the kind of fabric that is the most suitable for their uniform(s). For example, Polyester/Cotton blend may be more durable and may be better for indoor, air-conditioned environments. Also, consider your employees and their busy schedules; make sure their shirts are easy to maintain. All B&C Shirts are easy care treated.

2 PICK THE RIGHT COLOUR

From classic shades to brighter colours, B&C Shirts offer the right colour range to fit any business. In any case, when picking your logo or embroidery, make sure to get high contrast between the logo and the garment and that the logo is easily readable, especially from a distance.

3 SELECT THE CORRECT SIZE

B&C Shirts are true to size, so you can order the normal clothes size and be confident that your team will be well dressed. To ease your size management, we have designed our shirts with a regular fit ensuring they suit a wide range of body shapes. Our wide size offer gives you the opportunity to have a full team uniform that is consistent in look, cuts and colours.

4 BE CREATIVE, BE VISIBLE

Consider changing your employee's uniform based on seasons, such as darker shades for winter and a brighter colour and logo for summer. Changing up uniforms can add interest to your business and catch customer's eyes. Think about your employee' shirt uniform as a support of choice for your business visibility.

5 OPT FOR THE RIGHT DECORATION TECHNIQUE

Embroidery may look best for a small logo on the front of the shirt. If you want a larger or all-over design, screen printing will be the best option. In any case, B&C Shirts are designed to be decorated and will give you enhanced printability.

SALES TEAM

THE FACE OF YOUR BUSINESS

When your sales team meets customers or prospective customers, the image they project is critical. A smart look improves the perception of service and quality, and makes your staff look more professional, credible and trustworthy. It makes them more comfortable and confident too.

CORPORATE EVENTS

SHOWCASE YOUR BUSINESS

Corporate events are all about showcasing the best your company has to offer, from products to services, from quality to customer care. The first impression made by your event team will help communicate professionalism in line with your brand image, so the choice of their uniform is key.

OFFICE & RECEPTION TEAMS

THE BEST RECEPTION

Put image first and you'll enhance the identity and perception of your business. Corporate reception teams are often the first opportunity you have of making the right impression, so ensuring they are always looking their best is important. That means their uniforms need to be stylish, comfortable and perfectly decorated to make your identity stand-out.

PRINTABILITY EXCELLENCE

The unique superior quality of **B&C Fine Piqué** has an ultra-tight honeycomb structure, giving a perfectly smooth surface for decoration.

THE B&C SAFRAN AND B&C HEAVYMILL POLO SHIRTS - 100% RING-SPUN COMBED COTTON

Tested and approved for all decoration techniques

- Digital printing (DTG)
- Waterbased screenprinting
- Discharge screenprinting
- Plastisol screenprinting
- Embroidery

B&C FINE PIQUÉ

When screen printing a polo shirt, the quality of the piqué is crucial. If you want to achieve a faultless screen print, you need the smoothest, most even surface and the least hairy yarn possible. This will ensure the perfect detailing and the best end-result of your design.

Not all piqués can say the same!

THE B&C ORGANIC INSPIRE POLO SHIRTS - 100% RING-SPUN ORGANIC COTTON

Tested and approved for all decoration techniques

- Digital printing (DTG)
- Waterbased screenprinting
- Discharge screenprinting
- Plastisol screenprinting

IGNORE THE WEATHER, ENJOY THE MOMENT

Working outside, cycling, climbing or just walking in the city, B&C Softshell jackets are ideal for a wide range of outdoor activities.

WATERPROOF

Wet fabrics rob the body of warmth. By keeping water out, the durably waterproof B&C Softshell Jackets prevent heat loss, so the wearer stays dry and comfortable, whatever the conditions.

WINDPROOF

Even light winds can penetrate most fabrics, this can be chilling and uncomfortable. Thanks to their inner membrane, B&C Softshell Jackets are windproof, to keep the wearer warm.

BREATHABLE

Good insulation is also about ensuring that body moisture can effectively escape, keeping the wearer dry on the inside too. The breathable membrane at the heart of the B&C Softshell fabric ensures that moisture evaporates easily, even during exercise.

PERFECT PROTECTION

The strength of the B&C Softshell Jackets lies in their 3-layer construction. A waterproof, windproof and breathable membrane is bonded both to the outer fabric and the inner lining. The benefit: no movement between the layers, which means less wear and tear and enhanced durability.

B&C OUTERWEAR UNIT

DECORATION MADE EASY BY B&C

To make designs stand up, decorators need beautiful, premium quality and easy to print products. Our aim is to make the decorators happy by proposing a collection that provides the best canvas for printing or embroidery.

Each style of the B&C Outerwear Unit is designed to be decorated and to ensure great brand visibility.

OPTIMISED PRINT AREA

Decoration areas have been optimised on every style, to make sure you can make your customer's brand or message stand out.

EASY ACCESS SOLUTION

B&C Jackets are equipped with hidden entries to give easy access for decoration and avoid any limitations - that you would expect from a lining or padding - without compromising look, finishing and quality.

Display your ideas on the back, on the front and in some cases on the sleeves too.

B&C
COLLECTION

B&C COLLECTION
-
INSPIRING YOU AND YOUR BUSINESS

Whether you're looking for the perfect complement to the day-to-day uniforms of your sales teams and reception staff or team uniforms for corporate events we have it covered. From the elegance of the B&C-The Shirt Culture collection, to classic cut polo shirts and smart, functional jackets, we have the styles that will give your teams a professional look in any business situation. Your employees will feel good about how they look, giving them the confidence to deliver that perfect first impression.

B&C's pan-European coverage guarantees availability and quick delivery, whilst stringent quality controls ensure total consistency – of quality, styling and colour. This means that you can be confident that each repeat order will be identical, whatever the timeframe.
